Inbreeding is the result of mating between related breeding stock.

Inbreeding coefficient

Inbreeding coefficient for the horse **GOVERNOR** : 0.59 %

Coefficient based on genealogical data stored in SIRE database

Generation depth

The percentage of known ancestors per generation only takes into account ancestors for which the origin has been certified. The inbreeding coefficient has been established based on these certified origins. There can be a difference between a 3-generation pedigree and the percentage of known ancestors actually used.
