## Inbreeding

Inbreeding is the result of mating between related breeding stock.

**This horse does not have an inbreeding coefficient.**

### Generation depth

The percentage of known ancestors per generation only takes into account ancestors for which the origin has been certified. The inbreeding coefficient has been established based on these certified origins. There can be a difference between a 3-generation pedigree and the percentage of known ancestors actually used.

Generation number	1°	2°	3°	4°	5°	6°	7°	8°	9°	10°
