Inbreeding

Inbreeding is the result of mating between related breeding stock.

This horse does not have an inbreeding coefficient.

Inbreeding coefficient for the breed **Cob Normand** : 0.67 %

This is the average inbreeding level in a reference population of thoroughbred horses COBND (COBND nés entre 2017 et 2021 pour la consanguinité affichée en 2024)

Generation depth

The percentage of known ancestors per generation only takes into account ancestors for which the origin has been certified. The inbreeding coefficient has been established based on these certified origins. There can be a difference between a 3-generation pedigree and the percentage of known ancestors actually used.
